SUMMARY

DevOps Lead | SRE with **11+ years** of IT experience and **7+ years** of expertise in **DevOps, Cloud, and SRE**. Proven track record of **leading cloud transformation, platform modernization, and DevOps initiatives** across **AWS and GCP**. Experienced in architecting **highly available infrastructure, enterprise-scale CI/CD platforms, Kubernetes environments, Infrastructure as Code**, observability, and automated operations. Strong focus on **improving reliability, optimizing cloud costs, accelerating software delivery**, and driving operational excellence. Experienced in **technical leadership, mentoring teams**, and partnering with cross-functional stakeholders to deliver **scalable, secure, and high-performance platforms** while leveraging **GenAI** to enhance engineering productivity.

EXPERIENCE

08/2025 - Present

Pune

DevOps Lead | SRE Specialist

Equifax

U.S. global credit reporting agency.

- Established GenAI adoption strategy that reduced mean time to resolution by 40% and cut scripting time by 50% through AI-assisted automation.
- Led cloud migration using lift-and-shift, ensuring minimal downtime and seamless transition. Collaborated with cross-functional teams for operational continuity.
- Improved production availability to 99.9%+ through monitored HA architecture, proactive monitoring, automated recovery, capacity planning, and SRE practices.
- Budgeted and optimized cloud infrastructure resources across environments, balancing performance, availability, and cost while driving cloud modernization initiatives.
- Led the design and implementation of enterprise-scale CI/CD pipelines using Jenkins, GitHub, Terraform, and Kubernetes, reducing deployment time by 80% while enabling multiple production releases per day.
- Architected and managed highly available cloud infrastructure GCP using Infrastructure as Code (Terraform), implementing reusable modules, automated provisioning, and disaster recovery strategies across multiple environments.

11/2023 - 07/2025

Remote

Senior DevOps Engineer

Infogain

A technology consulting and services company.

- Applied GenAI for infrastructure provisioning with Terraform, accelerating deployment processes and reducing provisioning time by 50% through automation with Jenkins.
- Adopted AWS Transit Gateway for a scalable and secure networking architecture across multiple AWS accounts, and configured services such as VPC, IAM, and Route53 for secure solutions.
- Reduced infrastructure expenses by 50% through AWS EC2 Spot Instances for QA and Development environments and improved and refined resource utilization by 30% with Kubernetes horizontal pod autoscaling.
- Migrated from AWS CDK to Terraform, enhancing update processes by 30% and standardizing configurations for consistent deployments with Terraform-based IaC.
- Ensured code quality and compliance by implementing automated security scans with SonarQube via GitLab CI and maintaining high availability with Docker and Kubernetes (EKS).
- Prepared for disaster recovery with systematized RDS and EFS backups, ensuring business continuity while integrating artifact repositories using Artifactory.

01/2021 - 10/2023

Pune

DevOps Engineer

Precision Techserve Pvt. Ltd., Pune

A company providing IT support and solutions.

- Upgraded automation frameworks and IaC modules to standardize infrastructure provisioning and reduce manual intervention.
- Reviewed AWS networking configurations to ensure secure and optimized connectivity across VPCs, VPN, subnets, routing tables, NAT gateways, and security groups.
- Boosted deployment efficiency by 30%, facilitating DevOps support across projects, enhancing integration and delivery processes.
- Mentored team members in configuring SQL, MySQL, DynamoDB, and RDBMS databases within RDS service.
- Participated in troubleshooting sessions, resolving over 25 technical issues weekly to meet project timelines.
- Enforced security best practices to maintain data integrity and confidentiality across environments.
- Accelerated career progression through intensive upskilling in cloud technologies and DevOps practices.

EXPERIENCE

06/2019 - 01/2021

Pune

Onsite Support Technician

Quess Corp Limited

A company specializing in IT and workforce solutions.

- Gained practical experience in deployment workflows by participating in DevOps tasks such as release coordination, environment provisioning, and basic automation.
- Documented and logged the AWS network architecture, detailing VPC design, subnet configurations, routing policies, and security measures.
- Systematized AWS infrastructure (EC2, S3, VPC, Lambda) using Terraform for IaC.
- Handled and logged 150+ IaaS support tickets monthly for a diverse range of systems and software.

01/2019 - 05/2019

Pune

Printer Engineer

Aforeserve.com Ltd

A leading provider of IT services and solutions.

- Reduced setup time by 30% by efficiently assisting 50 clients with remote printer installations.
- Enhanced branch operations by 20% through comprehensive tech support via phone and computer.
- Provided prompt troubleshooting assistance.

05/2018 - 12/2018

Pune

Customer Support Engineer

Aforeserve.com Ltd

A leading provider of IT services and solutions.

- Conducted maintenance over 50 hardware and software components monthly, ensuring optimal project operation.
- Handled over 100+ customer tickets monthly, ensuring timely resolution and support.
- Managed and developed 10+ product support guides, contributed overseeing content accuracy and update frequency.
- Achieved 50% reduction in complaint resolutions by streamlining ticket categorization processes.
- Resolved 80% of support cases within 24 hours, enhancing customer satisfaction and trust.

10/2015 - 05/2018

Ahmednagar

System Administrator

Adsul's Technical Campus

An Educational Institute.

- Setup of various kinds of OS like Windows, Unix, Debian, Ubuntu, CentOS, RedHat...etc.
- Improved online exam support efficiency by 30% by orchestrating technical assistance strategies.
- Set up and maintained LAN and DNS for 200 PCs, enhancing lab connectivity and performance.
- Increased hardware repair efficiency by 20% by servicing 50 computer units, reducing downtime.

CERTIFICATIONS

AWS Certified Solutions Architect - Professional
